

AI RED TEAM

PROBLEM

Unvalidated LLM outputs are high-risk

- Hallucinations erode trust
- Compliance breaches are costly
- Resources wasted on rework

SOLUTION

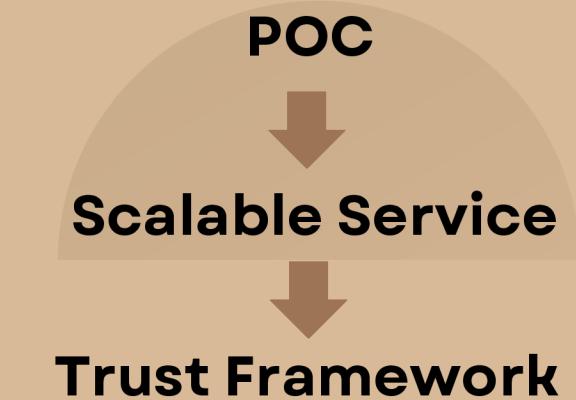

SAFETY SEAL for LLM

- Validation before delivery
 - Every prompt and response is checked for accuracy, compliance, and relevance BEFORE it reaching the user
- Compliance
 - Accuracy, compliance enforced
- TRUST
 - Trust built into workflows

VALUE SAFETY & TRUSTED AI

FUTURE AI VALIDATION FRAMEWORK

Framework Design

- Start small, Scale fast
- Standardize Guardrails
- Make trust an Enterprise-wide norm
